4" deep pitch bowl and stand (Other sizes of pitch bowls are ok, but either of these is preferred if purchasing a new one)

<https://www.riogrande.com/product/pitch-bowl-and-base-4-18-dia/118430GP/?code=118430>

Or

<https://www.riogrande.com/product/pitch-bowl-and-base-4-dia/118308GP/?code=118308>

Any pitch type/size pitch bowl will work. Deeper is better than small and shallow because the bowl tilts better.

Alternatives

These can all be substituted for whatever is comparable/available. None of the brand versions is absolutely essential.

Air/acetylene or other suitable torch for annealing

If you have an oxy mix torch (oxy-propane, Little torch, etc.) consider getting a rosebud tip to diffuse the flame for annealing more easily. Blazer torches work ok on a small scale.
